

Group Letter Template - offered as a way for you to introduce United Earth to life-affirming groups that you support. Please copy and paste the following text into your email - with the suggested subject: **United Earth - An Open Invitation for Co-creation** - and don't forget to add your signature!

Dear Co-Creators of a More Beautiful World,

Your work in the world shows that you are part of a global movement towards creating a brighter future for everyone. As you know, this movement involves hundreds of thousands of communities, organisations, tribes and networks, and hundreds of millions of people who are all, in their own ways, working for the same thing: a healthy, free, peaceful, diverse and abundant world. Through our universal connection to the Internet we have a powerful opportunity to begin working together at the global level to co-create the world we all know is possible.

United Earth is a collaboration of change-makers and international organisations working to provide an open, inclusive and equality-based platform for all people and groups to unite and cooperate for *a whole-systems transformation* of human society.

Rather than an “organisation of organisations”, United Earth aims to serve as a connecting and transparent framework for all people and groups to publicly add their voice, skills and creativity to our collective intention:

To recognise and promote all our common values and aspirations; our ecological solutions and social innovations; our alternative political and economic models; and to harness our collective intelligence, and our willingness and capacity to work together on the biggest intentional unification and conscious collaboration in human history.

Please visit the United Earth website (<https://united-earth.vision/en>) to find out more and become a part of our worldwide-collaboration. The platform is just getting started and we are already gathering and co-creating new paradigm tools, innovative methods and strategies for our global transition.

As a like-minded and established group, your participation and contribution can help extend the invitation for planetary unity and cooperation, and serve our collective ongoing development and integrity as a universal platform for all groups to share equally.

The change we seek is in our hands - when we join them together!

In unity and collaboration,
